Summary

Full Stack Web Developer with a degree in Psychology. Passion for problem solving and learning new skills. Excel at predicting user needs and catching errors early on. Known for a positive attitude and a tenacity for streamlining applications.

Technical Skills

Languages: HTML5, CSS3, JavaScript, jQuery, Node.js, MySQL, Sequelize, MongoDB, React, Web APIs, Markdown, Handlebars.js, Express, ReactJS

Applications: Heroku, GitHub, Material-ui, Bootstrap, Foundation

Projects

WineKey | <https://github.com/arielbs1991/Wine-Key> |
<https://fv-winekey.herokuapp.com/auth/login>

Developed for Fire&Vine, WineKey is a company-wide wine-tracking and inventory app with full create, read, update, delete, and search capabilities.

I managed the sequelize database for this project, created all of the routes and associations for the data tables, built the restaurant and inventory management pages, and managed the GitHub repository for the team.

This application utilized JavaScript, Sequelize, and Handlebars.

Wavel | <https://github.com/arielbs1991/Wavel-> |
<https://wild1k.github.io/Wavel-/>

Wavel allows a user to search for a location and return a weather forecast, list of best restaurants, hotel availabilities, and an interactive map of the area. I managed the zomato and openweathermap API routes, and wrote the scripts to connect functionality between front and back end. This application utilized Mapbox, Openweathermap, Zomato, and RapidAPI's hotels APIs, JavaScript, and Ajax, and Materialize.

Burger Builders | <https://github.com/arielbs1991/burger-logger-hw> |
<https://thawing-crag-34629.herokuapp.com/>

Burger Builders allows a user to enter a description of a hamburger, and move it between a “Ready to Eat” and a “Make it Again” table, or be permanently deleted. Created hamburgers persist on the deployed server for other users to see. I built the mySQL database, created the pages and styling, and built the functionality script for this project. This application uses mySQL, Handlebars, Ajax, CSS, and is deployed using Heroku and JAWSdb.

Experience

Manager and Server 2016-2020

Shelly's Burien, WA

Trained employees, daily oversee of business, managed scheduling and payroll, designed menus, facilitated fluid communication between customer and production line, memorized inventory, cultivated a cheerful and positive work environment.

Instructor 2015-2016

Fred Hutchinson Cancer Research Center South Lake Union, WA

Managed a team of eight toddlers, built curriculum and lesson plans, developed and optimized learning and organization strategies, tracked individual progress in online database, encouraged an open line of communication with parents.

Education

Bootcamp Certificate: University of Washington, Seattle, WA

A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, JavaScript, JQuery, Bootstrap, Node.js, MySQL, MongoDB, Express, Handlebars.js, & ReactJS.

Bachelor of Arts: University of Washington, Seattle, WA
